## Monthly ambient air quality snapshot for India

*January 2026*

● Good ● Satisfactory ● Moderate ● Poor ● Very Poor

## Key highlights

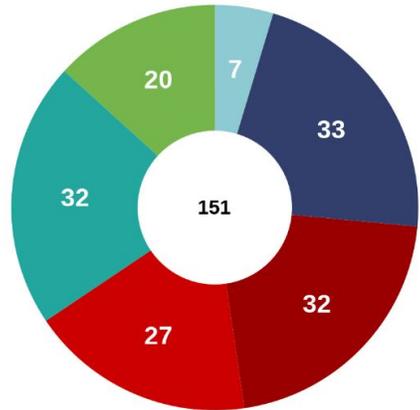

- **Compliance:** In January 2026, **nearly half (123 out of 248) of cities** with more than 80% of the days with continuous ambient air quality monitoring stations (CAAQMS) data available **recorded PM<sub>2.5</sub> concentrations above India's National Ambient Air Quality Standards** (NAAQS) of 60 µg/m<sup>3</sup>. None of the cities complied with the World Health Organization's (WHO) daily safe guideline concentration of 15 µg/m<sup>3</sup>.
  - **NCAP cities:** The monthly average PM<sub>2.5</sub> levels in 47 National Clean Air Programme (NCAP) cities (out of 97 cities with more than 80% of days with data) surpassed India's daily NAAQS for PM<sub>2.5</sub>, while all 97 cities exceeded the WHO's daily guideline.
  - **Non-NCAP cities:** Among the 151 non-NCAP cities with over 80% of days with CAAQMS data, all 151 cities reported monthly average PM<sub>2.5</sub> levels above the WHO daily guideline. 77 cities exceeded the daily NAAQS.
- **PM<sub>2.5</sub> AQI category:** Air quality conditions showed a gradual shift between December 2025 and January 2026. Cities in the 'Good' (0-30 µg/m<sup>3</sup>) category increased from 11 to 21, and those in the 'Satisfactory' (31-60 µg/m<sup>3</sup>) category gradually increased from 99 to 103. Meanwhile, the number of cities with 'Moderate' (61-90 µg/m<sup>3</sup>) air quality rose from 76 to 92. Also, cities in the 'Poor' (91-120 µg/m<sup>3</sup>) category reduced from 32 to 21, and those in the 'Very Poor' (121-250 µg/m<sup>3</sup>) category decreased sharply in count from 20 to 11.
- **Most polluted city: Ghaziabad ranked as the most polluted city in India in January 2026**, recording a monthly average PM<sub>2.5</sub> concentration of 184 µg/m<sup>3</sup>, surpassing the daily NAAQS limit of 60 µg/m<sup>3</sup> 100% of the days in the month.
  - Ghaziabad recorded 24 days in the 'Very Poor' category, four days in the 'Severe' (>250 µg/m<sup>3</sup>) category, two days in the 'Poor' category, and one day on 'Moderate' category.
  - **Delhi was the second most polluted city in India during January 2026, with a monthly average PM<sub>2.5</sub> of 169 µg/m<sup>3</sup>.**

- Throughout January, Delhi recorded 24 days in the ‘Very Poor’ category, three days in the ‘Severe’ category, two days in the ‘Poor’ category, and two days in ‘Moderate’ category.
- Noida, Gurgaon, Greater Noida, Dharuhera, Gangtok, Singrauli, Bhiwadi, and Narnaul were in the top 10 cities, with Noida and Narnaul in third and tenth place, respectively.
- **Uttar Pradesh and Haryana each accounted for three of the ten most polluted cities in January 2026, followed by one city each in Delhi, Madhya Pradesh, Rajasthan, and Sikkim.**
- Several other cities, including Faridabad, Howrah, Pithampur, and Byrnihat also recorded daily  $PM_{2.5}$  levels exceeding the NAAQS every single day of the month.
- State with most polluted cities: Among all Indian states, Rajasthan had the highest number of cities exceeding NAAQS, with 23 out of 34 recording  $PM_{2.5}$  higher than NAAQS. Of these, 10 were in the ‘Satisfactory’ category, 19 cities were in the ‘Moderate’ category, four in the ‘Poor’ category, and one in the ‘Very Poor’ category. Haryana also had a high proportion of polluted cities, with 19 out of 25 exceeding NAAQS, followed by Bihar (15 out of 24 cities), Odisha (13 out of 15 cities), and Uttar Pradesh (13 out of 20 cities) breaching NAAQS limits.
- Cleanest city: **Damoh, in the state of Madhya Pradesh, was the cleanest city in India during January**, with a monthly average  $PM_{2.5}$  of  $17 \mu\text{g}/\text{m}^3$ . The top 10 cleanest cities comprise five cities from Karnataka, and one each from Jammu and Kashmir, Madhya Pradesh, Bihar, Nagaland, and Punjab.
- Frequency in top 10 polluted cities: **A total of 53 cities were featured in the daily top 10 most polluted cities list in January 2026**, topped by Ghaziabad (28 days), followed by Delhi (27 days), Gurgaon (25 days), Noida (24 days), Greater Noida (23 days), Dharuhera (20 days), and Singrauli (15 days).
- Megacities: Delhi ( $169 \mu\text{g}/\text{m}^3$ ) and Kolkata ( $92 \mu\text{g}/\text{m}^3$ ) exceeded the NAAQS in January 2026, while Chennai ( $49 \mu\text{g}/\text{m}^3$ ), Mumbai ( $48 \mu\text{g}/\text{m}^3$ ), and Bengaluru ( $44 \mu\text{g}/\text{m}^3$ ) recorded monthly average  $PM_{2.5}$  levels below the standard.

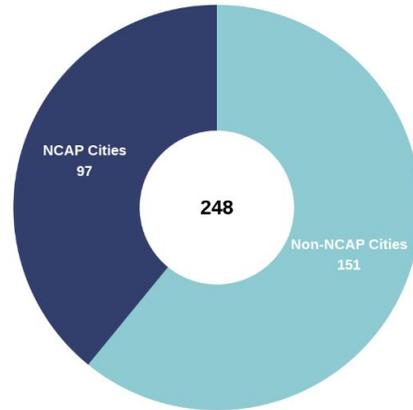

# Number of cities vs frequency of days

## with PM<sub>2.5</sub> concentration above NAAQS and WHO guidelines – January 2026

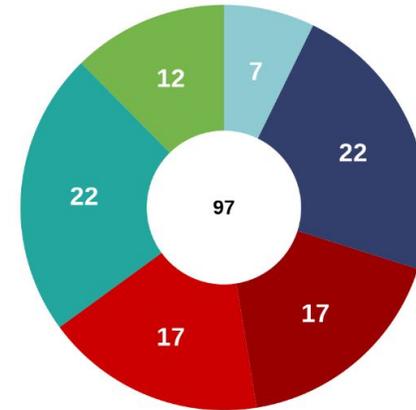

Categorisation of non-NCAP cities against compliance to NAAQS guidelines

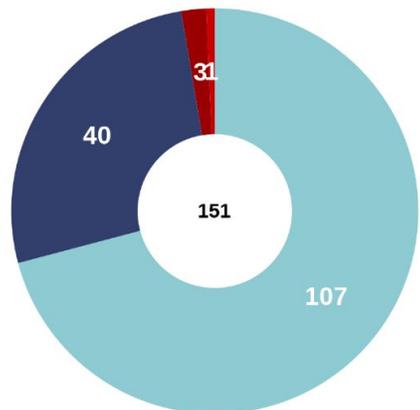

Total # of cities with >80% of the days with CAAQMS data

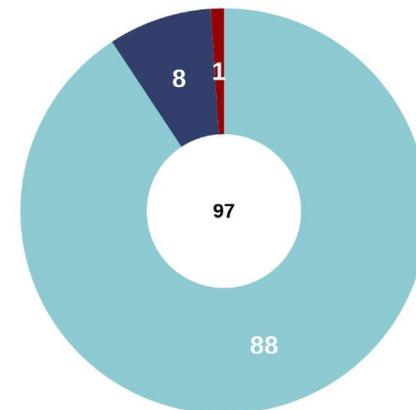

Categorisation of NCAP cities against compliance to NAAQS guidelines

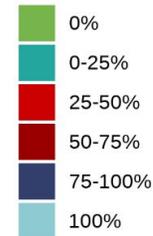

Categorisation of non-NCAP cities against compliance to WHO guidelines

Categorisation of NCAP cities against compliance to WHO guidelines

% of days above standard

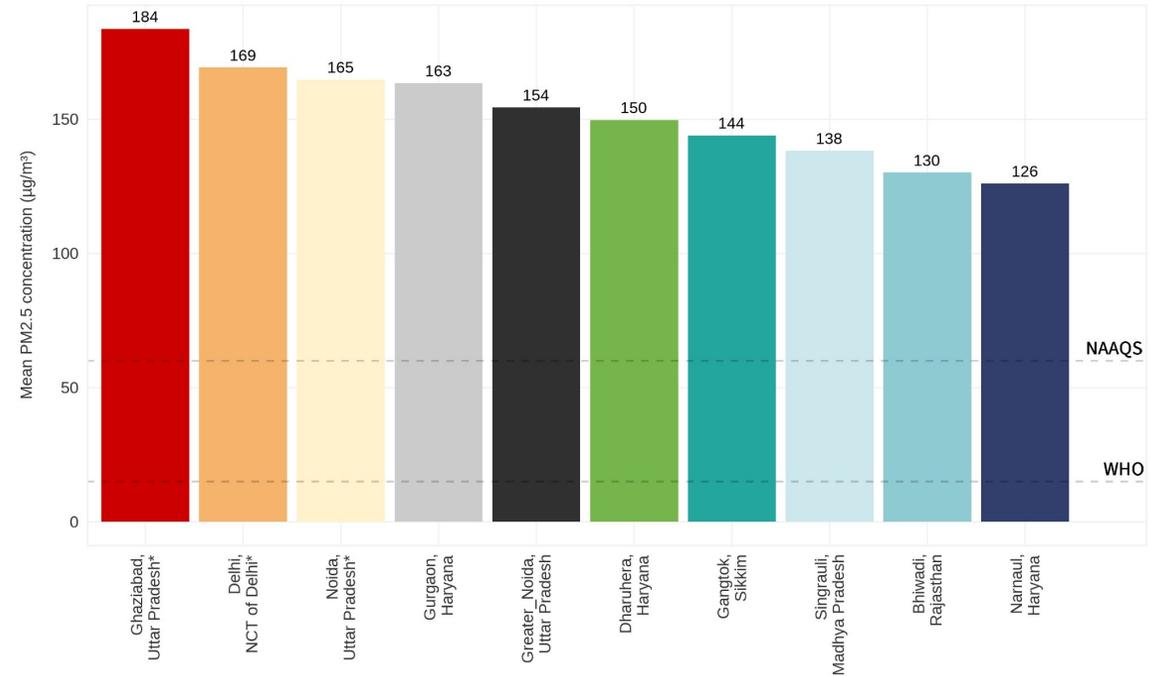

# Top 10 most polluted cities in India by PM<sub>2.5</sub> concentration – January 2026

Days in respective AQI categories based on PM<sub>2.5</sub> (µg/m<sup>3</sup>) – January 2026

City	Good (0-30)	Satisfactory (31-60)	Moderate (61-90)	Poor (91-120)	Very poor (121-250)	Severe (>250)
Ghaziabad	0	0	1	2	24	4
Delhi	0	0	2	2	24	3
Noida	0	0	3	4	21	3
Gurgaon	0	0	2	4	22	3
Greater_Noida	0	0	3	4	23	1
Dharuhera	0	1	1	5	23	1
Gangtok	16	5	0	0	1	6
Singrauli	0	0	3	8	20	0
Bhiwadi	0	0	3	13	15	0
Narnaul	0	0	7	9	15	0

Top 10 most polluted cities in India by PM<sub>2.5</sub> concentration - January 2026
